PROFESSIONAL SUMMARY

Motivated and detail-oriented Software Engineering undergraduate with hands-on experience in full-stack web development using the MERN stack. Skilled in developing responsive and scalable applications with modern frontend and backend technologies including React.js, Node.js, Express.js, and MongoDB. Experienced in implementing REST APIs, authentication systems, real-time communication, and responsive user interfaces. Passionate about problem solving, software development, and learning new technologies while contributing effectively within collaborative environments.

TECHNICAL SKILLS

- **Frontend:** React.js, HTML, CSS, TailwindCSS
- **Backend:** Node.js, Express.js, REST APIs
- **Database:** MongoDB, MySQL Basics
- **Tools:** Git, GitHub, VS Code, Postman, npm
- **Security:** JWT Authentication, bcrypt, Basic Encryption
- **Soft Skills:** Problem Solving, Teamwork, Communication, Time management, Adaptability

PROJECTS

AutoBid Lanka – Individual Project Dec 2025

– May 2026

Developed a full-stack MERN web application for vehicle trading with live auction and direct purchasing functionality. Implemented real-time bidding features, secure transaction workflows, and responsive dashboards for buyers, sellers, and administrators.

Key Responsibilities & Features

- Developed responsive frontend interfaces using React.js, Vite, and TailwindCSS.
- Implemented secure authentication and authorization using JWT and bcrypt.
- Integrated Socket.IO for real-time auction bidding functionality.
- Built RESTful APIs using Node.js and Express.js.
- Implemented AI-powered vehicle description generation using Google Gemini API.
- Developed KYC verification and admin approval workflows.
- Integrated Stripe API for escrow-based payment handling.
- Managed application state using Redux Toolkit.
- Used Redis for caching and performance optimization.

Technologies Used

React.js, Vite, TailwindCSS, Redux Toolkit, React Router, Axios, Socket.IO Client, Node.js, Express.js, MongoDB, Mongoose, JWT, Redis, Stripe API, Google Gemini API, Node mailer

Uni Hub Campus Connect – Individual Project

Jan 2026 – Present

Built a responsive full-stack student platform designed to help students access educational resources, upload notes, explore internships, and receive career guidance.

Key Responsibilities & Features

- Developed reusable UI components using Next.js and React.
- Built REST APIs with Node.js and Express.js.
- Implemented admin approval workflows for submitted content.
- Designed responsive user interfaces using CSS Modules and TypeScript.
- Managed MongoDB databases using Mongoose.
- Improved user experience with responsive and organized layouts.

Technologies Used

Next.js, React, TypeScript, CSS Modules, HTML, CSS, Node.js, Express.js, MongoDB, Mongoose, REST APIs

EDUCATION

BSc (Hons) Software Engineering

University of Plymouth

2023 – Present

G.C.E Advanced Level Examination - Physical Science

G.C.E Ordinary Level Examination

CERTIFICATIONS

- Introduction to Postman API – Great Learning
- Introduction to Cloud APIs – Great Learning

LANGUAGES

- Sinhala
- English
